

Accessibility Statement for eCARD Admin

Date: February, 2026

Product Version: eCARD Admin

Our Commitment

Quipu Group is committed to ensuring digital accessibility for people with disabilities. We are continually improving the user experience for everyone and applying the relevant accessibility standards.

Conformance Status

The [Web Content Accessibility Guidelines \(WCAG\)](#) defines requirements for designers and developers to improve accessibility for people with disabilities. It defines three levels of conformance: Level A, Level AA, and Level AAA.

eCARD Admin is currently **partially conformant** with **WCAG 2.2 Level AA**.

"Partially conformant" means that some parts of the content do not fully conform to the accessibility standard. We are actively working to address these limitations as part of our product roadmap.

Feedback

We welcome your feedback on the accessibility of the eCARD Admin. Please let us know if you encounter accessibility barriers:

- **E-mail:** help@quipugroup.com

We try to respond to feedback within 2 business days.

Technical Specifications

Accessibility of eCARD Admin relies on the following technologies to work with the particular combination of web browser and any assistive technologies or plugins installed on your computer:

- HTML

- CSS
- JavaScript

These technologies are relied upon for conformance with the accessibility standards used.

Limitations and Alternatives

Despite our best efforts to ensure accessibility of eCARD Admin, there may be some limitations. Below is a description of known limitations and potential solutions. Please contact us if you observe an issue not listed below.

Known Limitations for eCARD Admin:

1. **Data Tables:** Some administrative data tables (specifically within the Patron Statistics and Logs sections) may not be fully navigable via keyboard commands alone. We are currently refactoring these tables to include proper keyboard focus management.
2. **Contrast:** Specific error messages and inactive form elements may not meet the minimum color contrast ratio of 4.5:1.
3. **Screen Reader Feedback:** Users of screen readers may not receive immediate audio feedback when filtering results in the "Registration" module.
4. **Form Labels:** Certain input fields in the "Settings" configuration menu may lack explicit programmatic labels.

Remediation Plan: Quipu Group has an internal Accessibility Roadmap to address these issues. We are targeting corrections for the high-priority items (Keyboard Navigation and Page Titles) by the end of **Q2 2026**.

Assessment Approach

Quipu Group assessed the accessibility of eCARD Admin by the following approaches:

- **Self-evaluation:** Conducted internally using the WAVE Web Accessibility Evaluation Tool and text to speech support in MacOS.
- **Manual Testing:** Verified core user flows using keyboard-only navigation.
